

# Dipslides, Solar-Cult®

Nutrient Agar with TTC/Malt Extract Agar

## Description:

Solar-Cult® dipslides were developed to provide an inexpensive, fast, simple method for detecting microbial contamination in suspect liquids. The dipslides come in a sterile vial, they are double sided, enabling simultaneous examination of test specimens with two different selective media.

Nutrient Agar w/TTC will grow most bacteria and the colonies will appear a distinct, easy-to-read red color.

Malt Extract Agar is designed to grow yeast and molds.
