

# Tryptic Soy Broth/USP

20 ml fill, serum vial

---

## Description:

For the cultivation of microorganisms. Also known as TSB or Soybean-Casein Digest Broth, USP. Hardy Diagnostics' sterility media and rinse solutions are manufactured in an ISO 13485 environmentally controlled production center. Each lot is certified for pH, sterility and growth promotion using ATCC® strains specified by the USP. Our approach to manufacturing ensures all sterility media and rinse fluids provide the highest level of clarity for improved reading accuracy, thus significantly reducing the risk of incorrect interpretation and false results.
