BioClean-D Coveralls

The BioClean-D Coverall with Hood is a single-use disposable garment which offers exceptional comfort and protection for the cleanroom technician with additional thumb loops for a secure hold. The product has been carefully developed, designed and constructed to be compatible for use in ISO Class 4 cleanrooms.

Its white “CleanTough” fabric is particularly durable and is low-linting. The garment features a zip front with protective fabric flap and elasticated hood, back, cuffs and ankles and thumb loops on the wrist.

Available in sizes extra small to 4x extra-large - suitable for wearers from 5’2” (158cm) to 6’8” (206cm) - the coveralls are manufactured in a facility holding ISO 9001:2008 certification. Each garment is individually sealed in double plastic packaging and each sealed carton contains 20 coveralls (or 15 for sizes 3XL & 4XL).

VertiKlean Max Mopping System

For unmatched absorbency, the VertiKlean MAX* mop head features a single layer of hydrophilic polyurethane foam laminated to polyester fabric backed by a semi-rigid thermoformed plate that easily snaps onto a VertiKlean mop head frame. While its performance is similar to that of our industry-standard VertiKlean mops, VertiKlean MAX has a slimmer profile for cleaning in tighter spaces. VertiKlean MAX also offers increased sorbency.

Designed for applying disinfectants to both horizontal and vertical surfaces, the lightweight disposable VertiKlean MAX is ideal for general cleaning of ceilings, walls, and floors. Compatible with QuickConnect mop handles, the pivoting mop head frame makes it easy to clean around door and window frames as well as light fixtures and heavy equipment.

QuickKlean Mopping System

The combination of the lightweight, easy to maneuver hardware and particle pick-up capacity of the MicroGenesis microfiber wipe delivers unprecedented performance. The QuickKlean mop head frame is available in durable plastic. The foam mop head is laminated with knitted polyester and is abrasion resistant.

The cleanroom laundered MicroGenesis wipe delivers the maximum amount of microfiber to pick-up and retain particles, dust and other contaminants. Compatible with a wide range of disinfectants, chemicals and solutions, Contec's QuickKlean mop with MicroGenesis offers users a lightweight option for wet or dry floor, wall, and ceiling cleaning.

QuickKlean Mopping System Features:

- Use at the beginning or end of each shift to clean pharmacy cleanroom floors
- Ideal for disinfecting floors, walls and ceilings during weekly and monthly cleaning
- Superior particle pick-up capacity
- Meets all USP cleaning requirements
- Designed for single use to eliminate cross contamination

Media Fill & Fingertip Sampling

Medium Risk Level Media Test Kit

A self-contained ready-to-use kit with all the products needed to easily assess the risk of microbial contamination of your CSPs (Compounded Sterile Preparations) according to the new USP 27, Chapter <797> requirements for media-fill challenge testing. Kit performs one complete test for one technician. Includes test results log sheet.

For use in accessing the risk of microbial contamination of Compound Sterile Preparations (CSP) in accordance with USP <797> requirements for media-fill challenge testing for validation of aseptic process simulation. Kit contains a self-collapsing flexible bag to dispense media by gravitational force. The bag is equipped with a winged spike-port for use with a spike to pierce the membrane of the port. Fluid in the path will remain open once the spike is removed. The second port is used to fill the bag and is not designed for media fill test. .

Activity Documentation Software

A.R.T. (Accurate Recording Technology)

The Preferred Pharmacy Activity Documentation Software

A.R.T. is an economical solution for keeping record of the numerous activities required by USP <797>. Ongoing Environmental Monitoring, Personnel Training and Testing, and Equipment and Room Certification is easily achieved with A.R.T. 's secure, easy to use, web-based interface.

Environmental Recording, Monitoring, Reporting

Environmental monitoring data must be collected and trended as a means of evaluating the overall control of the compounding environment. A.R.T. offers a quick entry screen for staff for documentation, alerts for overdue tasks and out of range data and provides comprehensive reports for facility, staff, equipment and rooms.
